

Our Company

Eko-Okna S.A. is a manufacturer with an international reach, offering windows and doors made of PVC, wood, aluminium and steel. We have been on the market since 1998. Production takes place in halls with state-of-the-art automated production lines, supported by qualified and experienced staff. We focus on development and innovation. We were the first in Europe to introduce to mass sale windows made in the V-Perfect shape welding technology.

Our offer is constantly expanding. Already today we are able to offer you several dozen different window and door systems. We also offer sliding systems, roller shutters, sectional garage and industrial doors, mosquito nets, fences and pergolas. As an addition to windows and doors, we offer covers. We produce internal and external roller blinds, facade blinds and shutters.

Everything is of the best quality, because we use only high-quality materials from leading European suppliers.

Years of experience allow us to accurately predict demand and respond to customer needs. Striving for a fresh perspective on evolving trends enables us to craft products that precisely meet all market demands. Multi-million investments in machinery, experience and multilingual staff make our export strength grow year by year. We are successfully expanding into European and non-European markets.

The quality of our products and the actions we take have gained the recognition of customers around the world. So far, we have created a powerful sales network, which we are constantly expanding.

FRONT DOORS

We have prepared a wide range of designs to choose from. Modern technologies used during production guarantee high resistance to external conditions and easy cleaning. We also offer the possibility of making doors according to your own design, we suggest the best construction solutions.

Door panels

Doors from the Eko, Alu and Wood lines are the most popular, universal solutions, chosen by the largest group of customers. We offer a wide range of design available panel fillings and we allow customers to create their own projects, which we then implement for them. The materials and production techniques used ensure durability and ease of cleaning. Glazing can be installed in the doors.

Available colour options:

- Aluplast
- Salamander
- Gealan
- RAL

Materials from which the door can be made:

- PVC
- Aluminium (ALU)
- Wood

Panel fillings available:

- foam
- plywood + XPS extruded polystyren

Panel filling

We offer our customers panels with three types of filling - polyurethane foam, plywood or XPS extruded polystyrene. Each of them can be 24, 36 or 48 mm thick. Panels, depending on customer preferences and technical requirements, are made of HPL boards or aluminium sheet. HPL boards are veneered, sheet metal – varnished. On the other hand, in wooden doors, we offer panels with a thickness of 24, 34 and 46 mm.

Door glazing

As a standard, glazing in door panels is made of frosted glass. In panels with a thickness of 24 mm, we use safety glass on the external side. In panels with a thickness of 36 and 48 mm, the glazing is made of safety glass on both sides.

VSG 33.1 ONE MAT

Safe glass

Safety glass is made by covering the glass with special polyvinyl butyral films. In case of glass breakage, the glass fragments remain attached to the film (VSG glass). Tempered safety glass is characterised by greater resistance to breakage and temperature changes (ESG glass). Broken glass of this type breaks into small pieces with blunt edges, which reduces the risk of injury.

Ornamental glazing

We offer a wide range of glass with a motif, made of transparent glass and ornamental glass in the most popular patterns. Ornamental glass will work in homes, offices, shops, hotels and restaurants. It provides privacy and brightens the interior.

Glass panels

EkoVitre glass door panels are chosen by architects who care about using as much natural light as possible. This elegant door, suitable for any style, can be adapted to individual needs thanks to the large number of finishing options. This is a great solution for individual and institutional investors.

EkoVitre

Available colour options:

- Aluplast
- Salamander
- Gealan
- RAL

Materials from which the door can be made:

- PVC
- Aluminium
- Wood

Panel fillings available:

- glazing unit (44.4 sandblasted / 18Ar/44.2th)

Embossed panels

ClassicLine is a combination of traditional aesthetics and modern materials, thanks to which the customer buys solid doors at an attractive price. The number of colour variants is impressive, and the resistance to external factors guarantees high comfort of use for years. Thanks to good performance parameters, they are an interesting proposition for investors who care about low maintenance costs.

EkoGreen embossed panels

EkoGreen combines the highest level of thermal insulation with a diverse design inspired by Mediterranean stylistics, allowing for the creation of exterior doors that stand out in every way. The EkoGreen collection allows for the composition of panels with side inserts, bottom panels (Sottotraversi), and shutters (Scuretti).

A complete list of designs is available in the sales department.

- Materials from which the door can be made:
- PVC

- Available colour options:
- Aluplast
 - Salamander
 - Gealan

UNPARALLELED ITALIAN DESIGN

Italian style is one of the bases of all aesthetic trends prevailing in Europe. Starting from ancient Rome, great artists from the Apennine Peninsula delight us with their mastery of form. EkoGreen embossed panels perfectly match this sense of aesthetics, offering us a wealth of classic and exciting solutions.

Natural wood and rich design delight especially in the Mediterranean, where the possibilities of light control provided by glazing, side panels and accessories are also intensively used.

Ecology at the highest level

EkoGreen is not a random name. All products in this series are produced with particular emphasis on ecological issues. Their use allows you to reduce your carbon footprint by using safely sourced wood and improving thermal insulation by as much as 40% compared to typical door panels.

COMBINE ALL SOLUTIONS

EkoGreen panels were created to unleash the creativity of their users. All doors can be freely combined with extensions, equipped with Sottotraversi bottom panels and supplemented with Scuretti internal shutters. This way, you have an absolutely unique interior design at your fingertips, tailored to the character of the building and its users.

classic door panels and side panels

interior shutters

embossed bottom panels

Embossed panels

EkoGreen door panels are a combination of classic elegance and advanced technologies. Great emphasis was placed on ecology, which allowed us to further improve the operational parameters of the doors and their finishing options.

By reducing the weight of the door by 30%, it is possible to achieve better thermal insulation by up to 40%. This makes it easier to achieve thermal comfort in the interior. This is due to the layered structure of Hydro Exterior, made of medium-length chips, glued in such a way that the resulting panel is resistant to water and mechanical factors.

The multi-layer PVC-Acrylic foil makes the doors resistant to temperatures ranging from -50 to +120°C. It can also reflect up to 80% of UV radiation (Solar Shield technology), thus maintaining the colour, and the thickness of the coating is a great medium for creating 3D decorations.

- **panel thickness: 24-48 mm**
- solid or glazed door panels
- Hydro Exterior HDF board + XPS insulation
- one-sided (E-K), two-sided (E-M) embossed, milled or 3D relief
- embossed (as standard) or debossed (for an extra charge)
- safety glass 33.1 in glazing
- glazing with a glazing bead (ON type), without glazing bead (type O)
- maximum size 1100 x 2800 mm
- minimum size 200 x 1500 mm
- $U_p = 0.66 \text{ W/m}^2\text{K}$ (for 44-48 mm thick panels)

Embossed extensions

EkoGreen embossed extensions can be placed on one or both sides of the door. They can complement or contrast their aesthetic. They are used to create impressive, very elegant entrances to buildings, which are their real showcase.

You can choose from all the aesthetic solutions available for EkoGreen doors, which guarantees the ease of finding the option that will suit you best. Acoustic and thermal insulation parameters are also at an equally high level.

The possibility of using glazing makes the interior brighter, and various glass configurations mean even more creative possibilities.

- panel thickness: 24-48 mm
- solid or glazed door panels
- Hydro Exterior HDF board + XPS insulation
- one-sided (E-K), two-sided (E-M) embossed or milled,
- safety glass 33.1 in glazing

Interior shutters

Scuretti, i.e. EkoGreen internal shutters, are used wherever style is indispensable and adequate sun control is as crucial. The place where they are most appreciated are the seaside cities in Italy, but the heat pouring from the sky and the beauty of Italian architecture mean that people from other parts of the world also invite them to their homes..

They limit excess light entering the interior, protect it from overheating and provide privacy for household members.

INTERIOR SHUTTERS

Scuretti

- **panel thickness: 18 mm**
- heat protection and light intensity regulation
- Hydro Exterior HDF board
- embossed or milled on both sides
- maximum size 800 x 2400 mm
- minimum size 200 x 200 mm

BOTTOM EMBOSSED PANELS

Sottotraversi

- **panel thickness: 24-48 mm**
- solid door panels
- Hydro Exterior HDF board + XPS insulation
- one-sided (E-K), two-sided (E-M)
embossed or milled
- maximum size 1100 x 2800 mm
- minimum size 200 x 200 mm
- $U_p = 0.66 \text{ W/m}^2\text{K}$
- (for 44-48 mm thick panels)

Embossed bottom panels

An exceptionally popular addition to EkoGreen doors are Sottotraversi panels, i.e. embossed bottom panels. They are one of the hallmarks of elegant doors in Mediterranean countries, although they also fit perfectly into the style more common further up north.

The thermal insulation of the lower panels is exactly the same as in the case of the basic EkoGreen panels, so their use does not negatively affect the technical parameters of the entire door. The acoustic insulation and durability of the product do not deteriorate either.

All embossed bottom panels are compatible with all EkoGreen embossed panels, allowing you to create any configurations.

Elegant Italian design will satisfy the most demanding customers. We have beautiful, timeless designs of interior shutter panels and embossed bottom panels, including: Stella, Milano, Roma, which will perfectly match your style.

PVC model doors

We create model doors based on the most popular window and door systems in our offer. In this way, we guarantee perfect aesthetic consistency of the woodwork throughout the house. At the same time, we use solutions with the best performance parameters. The panels can adapt various glazing layouts and use the same colour schemes as windows.

Profiles from which the door can be made (Aluplast colours):

- Ideal 4000
- Ideal 5000
- Ideal 8000
- EkoSun 70

Profiles that can be used to make doors (Salamander colours):

- BluEvolution 92

Overlay panels **PVC**

The attractive aesthetics of the fully covered door leaf frame, rich colors, glazing, and accessories make overlay panels consistently eye-catching. This option is exceptionally durable, with a solid core and GFRP overlay that together offer above-average performance characteristics.

Steel doors

Steel doors are made on the basis of profiles also used in windows systems. They combine original design and above-average durability. The filling in the form of XPS polystyrene foam or OSB board with increased strength is responsible for the insulation. Made of galvanised steel, the panels perfectly fit into the minimalist style of contemporary architecture.

Materials from which
the door can be made:

- Steel

Available colour options:

- RAL

Panel fillings available:

- foam
- OSB board

Alternative fillings for **steel doors**

In addition to standard fillings, alternative options are also available for steel doors, characterised by various technical parameters and aesthetics.

Garage door panels

The panel used in the garage door was integrated into the door. They are durable and easy to maintain and guarantee good thermal insulation. Choosing consistent aesthetics for the garage door and the external door grants elegance to the whole building.

Garage door panels can be used with Presto and Unico profiles.

Aluline panels

The filling in the form of Aluline panels allows you to choose from a rich catalogue of popular solutions, and even create your own project. Durable aluminium is an elegant choice for years that is easy to match with any building style.

Aluline panels can be used with Presto, Unico and Unico XS profiles.

EkoVitre panels

EkoVitre glass panels in steel doors are effective and universal thanks to the wide range of available designs. It is possible to prepare your own proposal. This extremely fashionable, safe option allows you to use natural light wisely and create original arrangements at the same time.

Eko-Vitre panels can be used with Presto, Unico and Unico XS profiles.

Warm threshold

We offer the installation of a warm threshold in two variants. The customer can choose to install it with insulation material or on a PVC system extension. In both cases, the user will gain proper thermal insulation below the floor. This solution prevents the formation of thermal bridges, thanks to which cool air does not get inside the room.

Threshold-free external door

They are distinguished by a double magnetic gasket in a flat threshold and levelling with the floor level up to 30 mm. Thanks to these features, the barrier between the apartment and the terrace is almost non-existent. Children, the elderly and people with disabilities enjoy the comfort of moving around the house without obstacles. The harmony of the living room with nature and the surroundings allows you to enjoy the charms of warm days.

Door accessories

Accessories for the offered doors are not only a wide selection of handles and handrails in various shapes and colours. In addition to them, there are also additional technological solutions for hinges or espagnolette, as well as letterboxes or peepholes or devices controlling access to the building. The catalogue presents basic door accessories, the full offer is available in the sales department.
